

AL-KO Rental AHU

Complete AHU Systems
as Plug-and-play solutions

AL-KO Rental AHU 50

- Airflow rate of 5,000 m³/h
- Cooling capacity approximately 50 kW
- Heating capacity approximately 100 kW
- Connection: DN32

AL-KO Rental AHU 150

- Airflow rate of 20,000 m³/h
- Cooling capacity approximately 148.80 kW
- Heating capacity approximately 296.6 kW
- Connection: DN50

AL-KO Rental AHU 400

- Airflow rate of 44,000 m³/h
- Cooling capacity approximately 333.0 kW
- Heating capacity approximately 667.3 kW
- Connection: DN100

Rental AHU Efficiency

- Airflow 10,000 m³/h
- External Pressure Supply Air 770 Pa, Exhaust Air 780 Pa
- Internal Pressure Supply Air 600 Pa, Exhaust Air 404 Pa
- Air Velocity 1.9 m/s
- Heating/Cooling supply ready for operation
- Complete AHU unit mounted on a base frame for lifting onto the roof or next to the building
- Control system with a high level of sensor equipment, configurable for all applications
- Integration into building management systems via BACnet and Modbus
- Worldwide monitoring via AL-KO REMOTE CONTROL possible
- Plug-and-play solution with a single electrical connection

Your Advantages

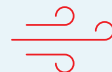

Advantageous transport due to the transport base frame with openings for the forklift and the widened base frame as collision protection

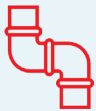

Connection via CE plug, main switch, and emergency stop also available

Quick and flexible installation through air discharge openings

Various filters available depending on the application (supply air or exhaust air)

Only connection to the heat exchanger needed, internal piping including integrated valve already completed

Change-over coil for heating or cooling, or heating and cooling, depending on the on-site connection

Plug-and-Play Control with simplified user interface

Highly efficient EC fans for low power consumption

The rental units from AL-KO are available for rent directly from our strong partners Trane and MTA!
